

Project Monitoring, Supervision and Evaluation

Objectives

After the completion of the course, you are able to:

- understand of MS&E backgrounds
- develop system for monitoring and supervision with measureable indicators and outcomes
- efficiently use skills for M&S
- participate in an evaluation
-

Course length: 4 days

Course Agenda

1. Basic foundation

- 1.1. Concepts of monitoring, supervision and evaluation
- 1.2. Project cycle

2. Monitoring

- 2.1. Establishment of a monitoring system with measurable indices and analysis methods
- 2.2. Transformation of monitoring results into project planning and decision making revision

3. Supervision

- 3.1. Skills for performing a productive supervision
- 3.2. Maximizing supervision results for project quality improvement

4. Evaluation

- 4.1. Process evaluation
- 4.2. Impact evaluation
- 4.3. Outcome evaluation

5. Some basic evaluation designs and techniques

- 5.1. Quasi-experimental design for estimating the size of project impacts
- 5.2. Cost-effectiveness analysis
